

Hello,

**Tech Platform Integration** | Initiative is excited to announce benchmark partners for 2025, including our newest partner Novata

The EDCI is excited to announce the set of [ESG Data Platforms](#) that are partnering with us to enable the initiative benchmark to be viewed directly within their data platforms this year via EDCI's outbound API: [Dasseti](#), [Green Project Tech](#), [Novata](#), [Pulsora](#) and [Re:Co](#).

Each of these platforms are complying with the EDCI's rigorous data security protocols and are able to offer their EDCI premium GP and LP clients visualizations of the EDCI benchmark directly in their platform, enhancing their suite of services.

If you are using a different ESG Data Platform and would like them to add this capability, or are a data platform interested in connecting to the EDCI API, please reach out to us via [info@esgdc.org](mailto:info@esgdc.org)!

[Dasseti](#) is an award-winning technology provider with a specialized solution to collect, assess and report ESG information across private markets. With purpose built solutions for LPs and GPs across Private Equity, Private Credit, Real Estate and Fund of Funds, the Dasseti platform helps firms manage complex data structures and leverages Generative AI and document scraping tools to increase efficiency and ensure compliance across regulatory and stakeholder reporting. Their out-of-the-box regulatory reporting platform allows firms to visualize, report and export data in any way they like. Dasseti allows Sustainability and Impact Teams to considerably reduce the time spent on manual data collection/cleaning and seamlessly integrates with their existing workflows to free up more time for value adding tasks and help firms work towards a more sustainable future in private markets.

If you are interested in working with Dasseti, please contact Tim Mapley, Senior Sales Executive: [tmapley@dasseti.com](mailto:tmapley@dasseti.com)

[Green Project's](#) carbon accounting and ESG management platform cuts through the cost and complexity of collecting and reporting portfolio sustainability data. Purpose-built for the private markets, Green Project enables investors to confidently manage their financed emissions and streamline stakeholder engagement. For portfolio companies, Green Project will minimize the administrative burden of data collection by leveraging targeted API integrations into emissions activity data; providing Net Zero target-setting; and pre-populating audit-ready reports.

After joining forces with ACT Commodities, Green Project not only delivers accuracy, accessibility, and affordability but provides an end-to-end decarbonization solution for even the

most mature private market users including SBTi submission and renewable energy procurement.

If you're a PE or LP that is looking for a solution that provides white glove service and can alleviate the headache and manual work surrounding your carbon footprint, send Green Project a DM on LinkedIn.

- For European GPs and LPs, please contact Toby Robertson, Head of Private Markets, Europe, [Toby@greenprojecttech.com](mailto:Toby@greenprojecttech.com);
- For US GPs and LPs: please contact Darren Rivera, Head of Sales, [darren@greenprojecttech.com](mailto:darren@greenprojecttech.com)

[Novata](#) is the private markets' sustainability management partner. We empower investors and companies to achieve their sustainability goals with our trusted ESG data management platform and advisory practice—because it's good for business and it's good for the planet.

If you are interested in working with Novata, visit their website to learn more about their solutions for ESG data collection & reporting, carbon accounting, and regulations: [www.novata.com](http://www.novata.com).

[Pulsora](#) is a sustainability management platform that helps private equity firms and their portfolio companies simplify and consolidate complex ESG processes and data in one centralized hub. With Pulsora, private equity firms can access a comprehensive suite of tools to manage, measure, and report on their portfolio's ESG performance, enabling them to:

- Collect and organize EDCI and annual reporting metrics from their portfolio companies
- Provide their portfolio companies with tools to calculate their carbon emissions
- Prepare audit-ready reports—from LP tearsheets to SFDR disclosures to annual reporting
- Analyze the performance of their portfolio companies against EDCI benchmarks and their goals

Want to see how Pulsora can help you streamline and centralize your firm's sustainability data and processes? Contact Nicole Peerless or visit [pulsora.com](http://pulsora.com).

[Re:Co's](#) tech-powered advisory solutions enable private market investors and their portfolio companies to pursue value creation and sustainability in tandem. Our services build on your data and reporting foundation to help your fund demonstrate a track record on ESG performance improvement and value addition to investors and other stakeholders.

If you are interested in working with Re:Co, please reach out to them at [info@recoinsights.com](mailto:info@recoinsights.com)

**Metric Review Process** | The Steering Committee has recently approved a metric review process to ensure that the EDCI metric set continues to be meaningful and relevant over time

As we shared in last week's newsletter, the Steering Committee has recently approved updates to existing metrics as part of this year's sprint process, notably the Net New Hires and Employee Engagement metrics.

Additionally, the Steering Committee has approved a new process to review existing metrics that are experiencing low engagement to ensure that all of EDCI's metrics continue to align to EDCI's [Guiding Principles](#). The accepted policy places metrics 'under review' if two conditions are true:

1. Submission rate for a metric falls below 25%, and
2. Metric fails to fulfill metrics guiding principles in practice

Once a core metric is flagged, the metric will enter a 1-year review process to collect member feedback on ways to increase submission rates and consider changes to the metric guidance to better satisfy the guiding principles. If relevant improvements can be identified, the core metric will be revised. However, if no improvements can be identified, the metric will be removed from the EDCI's set of metrics.

If you'd like to discuss becoming a member of the EDCI and supporting our mission of driving convergence around meaningful sustainability metrics for the private markets, please reach out to us at [info@esgdc.org](mailto:info@esgdc.org)

Warm regards,

-The ESG Data Convergence Initiative Team
