

## Subject: It's here! Introducing the 2025 EDCI Benchmark

Hello ,

The EDCI is excited to announce the release of the preliminary version of the fourth annual ESG in Private Markets benchmark! Creating this benchmark would not be possible without the tireless work of our member GPs and we are excited to share it with our community.

### THE FOURTH ANNUAL EDCI BENCHMARK FEATURES...

This year's benchmark is the most robust to date, including over 225,000 data points from 8,100 portfolio companies spanning 84 different countries and 78 SASB industries, and represents significant growth over the previous edition. We are excited to share the results with our members and enable them to harness powerful bespoke analytics to inform sustainability strategy and data sharing.

If you are interested in formally joining the EDCI community and supporting our mission to help the private markets make progress on driving convergence around key sustainability metrics and generate useful, comparable, performance-based data, we welcome you to reach out to us directly or fill out the linked form below and select "Committed".
